Student's Weekly Report of Internship

Student Name:	Vadadoriya Abhi Jaysukhbhai
Enrollment Number:	220670131051
Week Duration:	19/01/2026 - 23/01/2026
Name Of Organization:	Innocreek - Solution
External Guide Name:	virul vegad
External Guide Contact details:	**Email:** contact@innocreeksolution.tech **Mob No:** 91578 93772
Internal Faculty Guide Name:	Prof. Birendrasinh Zala.

Work done in last Week with description (Attach supporting Documents Like Diagram, Screen Shot of each Work):

1. Learning a fundamental concept of react.JS
2. Learning to implement useeffect and API integration with GET, POST, DELETE Request.
3. Learning to implement UI components & props.

Plans for next week:

1. Start to making Uni-Truck project.
2. Start to build login authentication role wise.
3. Start to build forget password and reset password with Email authentication.

Total Working Hrs: 40

Signature of Student: Abhi

The above entries are correct, and the grading of work done by Trainee is

Excellent	Very Good	Good	Fair	Below Average	Poor

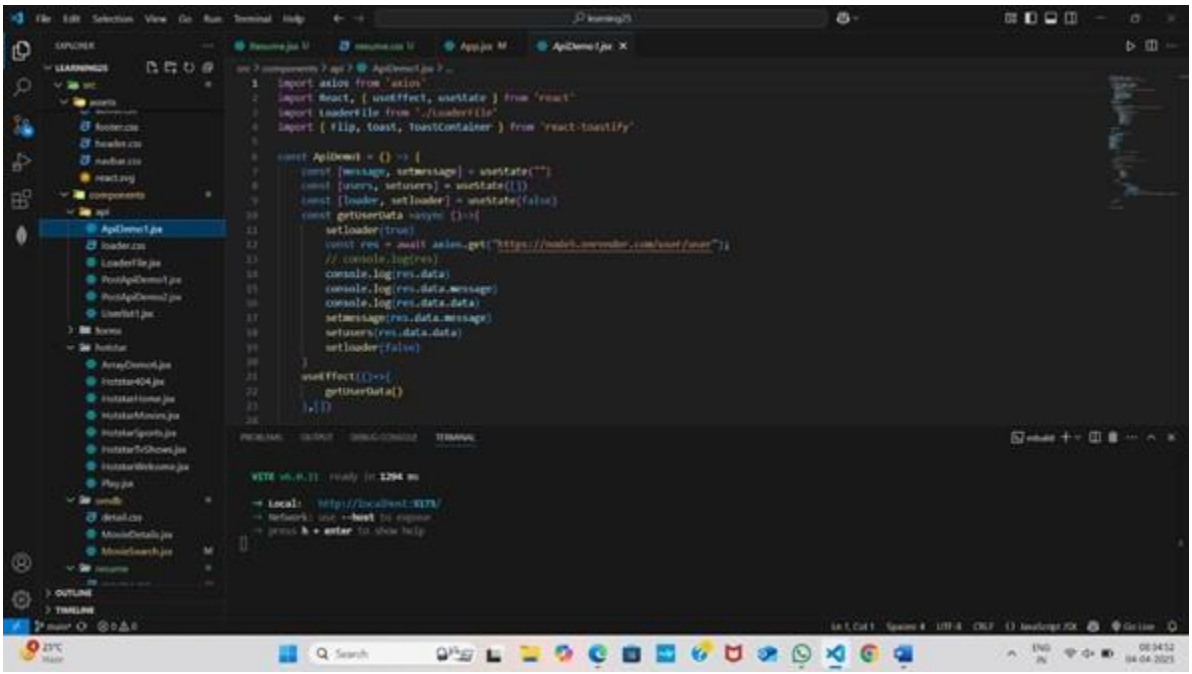
Weekly Report of Internship

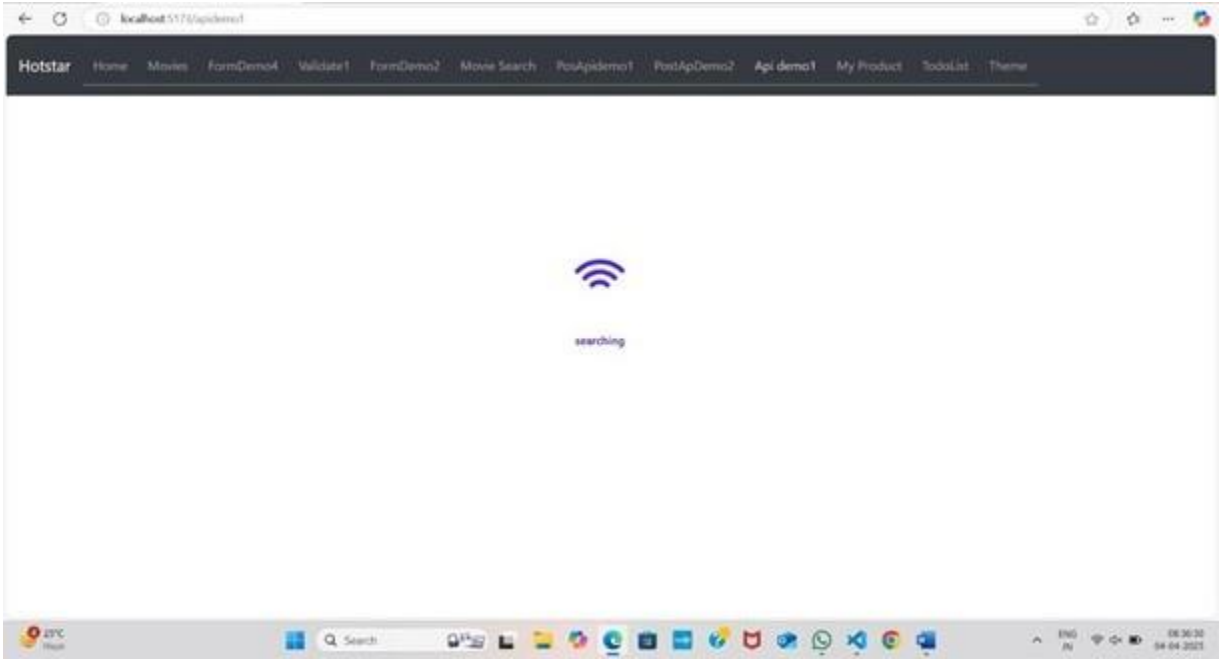
Learning in React JS:

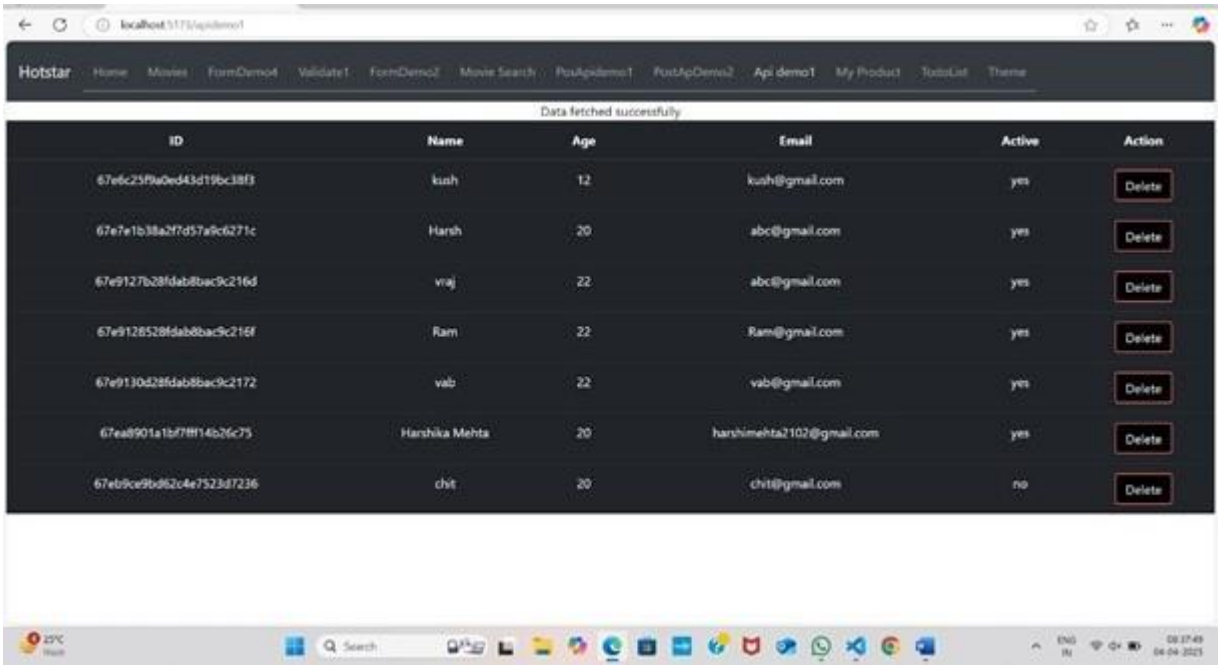
During the Forth week, I focused on learning API integration in React using Axios and explored various HTTP methods. Additionally, I implemented routing and enhanced the UI for the platform.

Concepts Learned:

- **API Calls using Axios:**
    - Learned how to use Axios to send HTTP requests.
    - Implemented GET, POST, and DELETE methods for data retrieval and manipulation.







In this API Demo we learn about how to get data from the url using Axios ,and post or Send the data using post method ,also using data delete button we can delete the entry by delete method.

Conclusion:

During the forth week, I gained hands-on experience in API integration using Axios and explored React's useEffect hook in depth. I also worked on implementing dynamic page routing and UI improvements.
